

Diagnosics for **Land Rover vehicles**

Dealer performance • Complete independence

"...I have researched every kit on the market - there is no competition..."

An award-winning combination

To ARD Land Rover Specialists, winner of Motor Trader's coveted 'Independent Garage of the Year 2005' title, being the best is the only option.

It is no surprise then that the diagnostic system they chose is Autologic for Land Rover. Russell Dykes, owner of ARD is full of praise for the system, "No diagnostic system offers the same flexibility and breadth of coverage as Autologic. To offer our customers top-quality service we need top-quality equipment; I have researched every kit on the market - there is no competition".

To Russell the design of the system is a major benefit, "We are a very busy garage so lack of space is always an issue. Our engineers can take the handheld Autologic out to a customer's car, freeing up space in the workshop. It also means we can move the system between branches, which is invaluable to a growing business".

Russell feels Autologic is a major contributing factor to ARD's success, "Autologic is a very powerful diagnostic tool and helps us provide the service that made us Independent Garage of the Year 2005."

Additional software

New dealer-level software for Mercedes-Benz, Jaguar, BMW, Volvo, VAG and Porsche vehicles has been designed to run on the same platform as Autologic® for Land Rover, offering multi-marque specialists complete servicing capability.
