without it..."**

More power with Autologic

MDP Land Rovers used to be based in Usk, Monmouthshire – but since using Autologic® Martin Detheridge's business has grown so much that he's moved to new premises at Grange Mill, Raglan. Now he has a fully modernised workshop and indoor showroom – and he still uses Autologic® four or five times a day. "I couldn't run the business without it," he says.

Most of the vehicles he services are still under manufacturer's warranty, but his customers prefer to use MDP because it's cheaper and faster.

They also come to Martin for the popular Autologic® Power Upgrade, which gives increased engine power and lower fuel consumption.

"Customers who do a lot of towing – farmers, builders and people with horse boxes – find that a new Defender just isn't powerful enough for a lot of hill work," says Martin. "Performance tuning from Autologic gives them the power they need."

Additional software

New dealer-level software for Mercedes-Benz, Jaguar, BMW, Volvo, VAG and Porsche vehicles has been designed to run on the same platform as Autologic® for Land Rover, offering multi-marque specialists complete servicing capability.
